Process-critical operations are vertically integrated to ensure single digit quality PPM and provide value-stream flexibility.

Unique process capabilities include:

- PCB Lamination to variety of substrates
- Design and Build high volume automation capable of producing raw to finished product
- Robotic testing

Specialized manufacturing processes include:

- Rapid Prototyping
- Injection Molding
- Insert Molding
- Paint and Laser etch
- PCB assembly
- Stamping
- Plating
- Machining
- Powder Coating
- Laminating
- Ultrasonic Welding
- Equipment / Tool Fabrication
- Testing
